

Replacement Filters

It is very important for digital projector filters to be changed regularly to prevent the projector from overheating. The Xenon lamp itself can also overheat if air filters become blocked which can lead to lamps not reaching their warranty hours.

TLS UK has researched and identified the filter media used in NEC, Christie and Sony projectors. Our high performance filters have been successfully protecting hundreds of digital projectors in UK Cinemas for over three years now.

We offer our filters sold in kits; customers just need to select the projector model:

Christie

Projector Model	Order Code	Filters Per Kit
CP 2000S	C004	1
CP 2000H	C004	1
CP 2000X	C004	1
CP 2000SB	C004	1
CP 2000ZX	C011B	1
CP 2220	C011	2
CP 2230	C011	2
CP 2000M	C012	1
CP 2000M	C012	1
Imax Digital Series 1	C004	1

NEC

Projector Model	Order Code	Filters Per Kit
NC 1200C	C010	6
NC 1600C	C006	5
NC 2000C	C008	6
NC 2500S	C005	3
NC 3200S	C009	7
NC 3240S	C009	7

***For Sony filters please contact TLS for more details.**

Material: 80% polyester staple fibre + 20% resin adhesive
 Flow rate: 1.5 m/s
 Resistance: < 40 Pa
 Efficiency: 60-70%
 Weight per m2: 60 g/m2
 Material colour : White
