

## TLS Digital Screen Checker

*Are your projector light levels DCI compliant?*

DCI Specifications

2D - 14 Foot Lamberts (+/- 3 FL)

3D - 4.5 Foot Lamberts(+/- 1 FL)

TLS UK has designed and developed a simple yet effective tool for measuring cinema projector light levels.

The unit is ideal for both Service Engineers who need a fast accurate light reading and for Cinema Managers who can check their cinema light levels as part of their routine maintenance checks.

- **Unique and simple design**
- **Easy to use**
- **Accurate light readings**
- **Low cost option**
- **Robust**

## Simple Operation Instructions

### User Instructions(2D)

- Turn on the projector lamp and wait 10 minutes to warm up
- Select the projectors white test pattern
- Position yourself in the middle of the auditorium
- Aim the Screen Checker at the centre of the screen
- Press the on button and check the light reading
- Adjust the projectors power until 14 fL is achieved
- Repeat once a week

\*When checking 3D light ensure the projector filter and 3D glasses are in place
